

THE COSMIC DAWN CENTER NEWSLETTER

Date: May 2020

UPDATE ON CORONAVIRUS

A new political agreement means that research active employees (VIP and TAP) for whom physical attendance is necessary to carry out their research can come to work from Wednesday 27 May. [Read more here.](#)

Employees who are included in the new reopening will be informed by their line manager.

Students who have teaching or exams that require physical attendance can turn up on campus if they have been notified in their KUmail. Students must, of course, be given reasonable notice if an exam is converted, and therefore this will probably only concern a few exams this summer.

The new agreement also means that clinics, summer schools and master programmes are likely to open from 27 May.

Administrative staff who have not been part of the previous opening phases must continue to work from home until August.

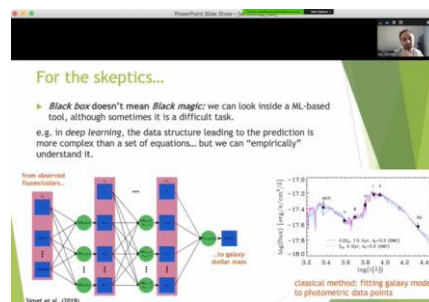

PHYSICS WEBINAR

On May 20, DAWN Associate Peter Laursen conducted a Cosmology Q&A session with a "Fysik B" class from Middelfart Gymnasium. The videos from the webinar can be found on Youtube and on Peter's website following this [link](#).

MACHINE LEARNING IN PHYSICS

On May 14, DAWN Fellow Iary Davidzon participated in the "Machine Learning in Physics" workshop. He gave a keynote talk titled "A data-driven approach in Astrophysics". The workshop was organized by NBI members.

UPCOMING EVENTS

❖ July 1-3:

DAWN Summit 2020. The summit has not been postponed as of now, and will most likely happen virtually, following the restrictions from the Danish government. We are still on the planning phase, stay tuned on our website for more information.

"ESCAPING" COVID-19

During May, some DAWN members "escaped" corona for one day. They spent the day along the coast in Northern Zealand, visiting small fishing towns like Hornbæk and Gilleleje. They also visited Helsingør, where the Kronborg Castle can be found.

EMPLOYEE NEWS

UPCOMING BIRTHDAYS

Next month we will celebrate 3 birthdays at DAWN!

ISABELLA'S PhD DEFENCE

We are very proud to announce that Isabella Chi Cortzen of the Cosmic Dawn Center will defend her thesis "A view into the interstellar medium of galaxies across cosmic time" on the **4th of June 2020**.

Spectators can join via Zoom following this link: <https://ucph-ku.zoom.us/j/66110688275?pwd=cnN5N0tEdTNRTkhoZmc4MGtVYUNOU T09>.

You can read the abstract [here](#).
