

THE COSMIC DAWN CENTER NEWSLETTER

Date: July and August 2020

WELCOME BACK

Dear DAWN Members!

Hope you all had a very relaxing summer vacation and that your families are well.

Now that the COVID-19 threat has proven to be somewhat manageable, it is time to come back and start up business as usual!

The move to our new offices in NBB is complete, the ventilation is working fine, and room temperatures are adjustable to your desired level of comfort.

It is a lovely spacious environment and the offices are light and airy. Constant disturbance from noise and on-going foot traffic is no longer an issue.

For those of you who have not visited your new office and unpacked your boxes, we ask that you do so by **1 September**.

As dictated by KU, practicing good corona prevention rules is necessary. You can read more on the rules and guidance [here](#).

For those of you who prefer to wear masks, we have those too.

You are all missed and we look forward to face-to-face interactions again at our team meetings, journal club, working groups etc. Please note that, all meetings and activities will take place virtually whenever required.

Additionally, we have a few things to celebrate and new members to welcome to our Team, both at DAWN NBI and DAWN DTU. More information on our welcoming activities will follow.

If you are uncomfortable returning to the workplace, that is understandable. Please reach out to Sune, Johan or me. Let's discuss your concerns and find a solution.

Hope to see you all soon,

Sune, Johan & Guarn

UPCOMING EVENTS

- ❖ **September 11** -Lunch at DTU - to welcome Steve Gilman, Lijjie Liu and Malte Algren to DTU – more information will follow.
- ❖ **September 29** - Meeting between DAWN and Management (for KU employed DAWN members)

IF YOU TEST POSITIVE FOR COVID-19

Employees and students must inform SCIENCE Help Desk if tested positive for COVID-19 by filling out one of the forms below:

Students, please [fill out this form](#)
Read more on your [Study information](#) > Coronavirus

Employees, please [fill out this form](#) and inform your immediate supervisor

Please also read:  [Emergency plan for COVID-19 infection 200820.pdf](#)

THE COSMIC DAWN CENTER NEWSLETTER

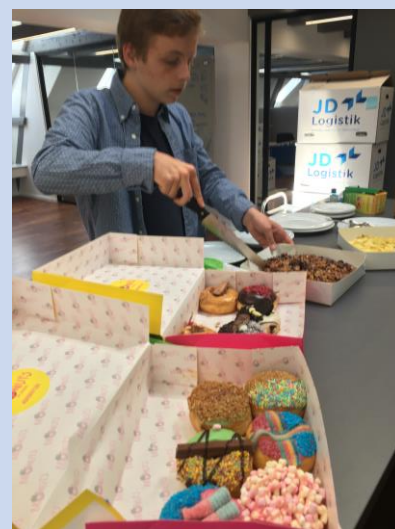

FEMALE SCIENTISTS WHO MADE NUCLEAR ASTROPHYSICS

Emeritus Birgitta Nordstöm is part of a project, which aims to show female role models who have made significant contributions in the development of astrophysics, nuclear physics, cosmology etc. As part of a dissemination work package, a calendar will be published (on paper) and distributed to high school students as well as young university students. The calendar will highlight a female scientist each month.

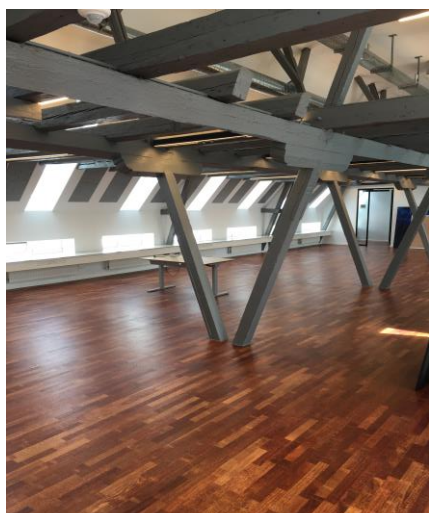

CAKE FROM BRONUTS

On 22 June, we celebrated Albert's Bachelor's defence and Charles brought donuts from Bronuts. You can buy them here: <https://www.instagram.com/bronutsdk/?hl=da>

WE HAVE LEFT VIBENSHUSET AND MOVED TO NBB

We have left Vibenshuset!

All of our belongings were packed and moved to the Niels Bohr Building during the first week of July.

We had many boxes; however, the move went without any trouble.

Gabe in his new office already at work during the chaos.

EMPLOYEE NEWS

UPCOMING BIRTHDAYS

Next month we will celebrate 3 birthdays at DAWN!

WELCOME TO THE COSMIC DAWN CENTER

In September we welcome many new members to the DAWN family.

Clara Arteaga (PhD), **Kate Gould** (PhD), **Maria Lundbye** (Office Trainee),

Catarina Rocha (Master's student), **André Endrup Hartwigsen** (Master's student), **Steve Gillman** (Post Doc - DTU), **Lijie Liu** (Post Doc - DTU),

Malte Algren (Master's student - DTU)

A warm welcome to all!

Pictures and profiles will follow.

GOODBYES

We said goodbye to some DAWN members over the summer including our long term intern Bidisha Zen, but you can follow her blog here, read about her time in Denmark during the COVID-19 outbreak and see what she is up to: [Bidisha's blog](#)

CHRISTIAN ON GO' MORGEN DANMARK (DANISH MORNING TV)

Christian and his friends were on the Danish morning TV (Go' morgen Danmark TV2) on 21 August to talk about their discovery about Gamma-Ray Bursts. You can watch the program on TV2 Play.

FRIENDLY REMINDER – SMOKING...

Please remember to follow the UCPH regulations and move **10 meters away from our buildings** before you smoke!

Thanks for reading! Comments, feedback or suggestions, please refer to dorte.garde.nielsen@nbi.ku.dk
