

★ Carlsberg Foundation ★

Charlotte Mason has received the grant of Semper Ardens: Accerlate from the Carlsberg Foundation with 5 mio. DKK to support!

“There is a missing chapter in our Universe’s history: we cannot see the first stars and galaxies that lit up the Universe. How and when did galaxies form from the primordial soup of atomic hydrogen and helium to produce the diversity we see today? This is still an open question and a frontier in astrophysics.”

Big congratulations to Charlotte Mason!

≧ Danish New Year’s Traditions ≦

On New Year’s Eve, when the clock turns to 18:00, many Danes turn on the television to watch **the Queen of Denmark give her yearly New Year’s speech** to the Danish population. It is live-streamed from Amalienborg and has been a tradition for the monarch since 1941.

The famous “Kransekage” is a traditional dessert and a Danish invention from the 1700s. Like Champagne, it is one of the fixed elements for a Danish New Year’s Eve. It’s a towering cake made from layer-upon-layer of marzipan rings. The cake’s turret-like shape promises happiness and wealth for the coming year.

...4, 3, 2, 1 – JUMP! In Denmark it is a New Year’s tradition to climb up on chairs or the sofa and leap off them as the clock strikes midnight. Why do they do it? It is aimed to banish spirits from the previous year and bring good luck to new – symbolically shows you are ready to in the new year ahead.
